

Specialist in Spare Parts of Sulzer Projectile Looms

**BEST QUALITY &
TECHNOLOGY**

ABOUT US

OMKAR Engineering Works, Ahmedabad is specialised in the weaving sector and most well-known manufacturer of Sulzer Projectile Weaving Machine replacement Parts For the Model PU, TW-11, P-7100 & P-7300. The company was formed in 1990 with the main aim of manufacturing 100% indigenous spares for projectile weaving looms. Our product range comprise of picking shoe, Picking lever, Projectile Returner, R H slide piece, and many more. Our Parts Have Been Marketed to india as well as Exported To Global Markets like South africa, South America, Indonesia, Sri lanka, Bangladesh, Nepal, Europe, Middel - east etc.

The high quality of its products, in combination with superior after sales-service and competitive prices, has allowed it to develop a superior reputation among its global customer base. Over **27 year** of experience in this field Omkar can offer a product range of unique and patented manufacture to give textile manufacturers reliable quality components at a cost effective price.

The components made from a special alloy steel undergo carefully designed dimensional and other inspections during the manufacturing process to provide fully quality assurance. Weather through continuous improvement in product quality or management, Omkar's motto is to **"Continuously Strive to Be the Best."** With innovation at the heart of its manufacturing philosophy, the company today is in a position of manufacture any mechanical component according to technical detail or sample.
